for water-based products

Use of the product:

For general purpose, suitable for matt topcoats and for basecoats, both clear and pigmented.
Please refer to the TDS of component A to check how to use the hardener and the correct percentage of use.

Specific weight	1,10 ± 0,02
Solid content	68 ± 2

General remarks

- The **hardener** in its original packaging and stored in rooms with temperatures between 5 and 35° C has a shelf life of 6 months.
- Close the can immediately after use, avoiding contact with the air.
- Mix well while introducing the hardener into component A with a mechanical stirrer.
- Use the catalysed component A within the time span indicated in its TDS.
- Do not use the leftover product after this time span.
- During application, the temperature of the product, the substrate and the working environment should never fall below 15°C.
- Coating leftovers (washing waters, waters from spray booths, used coatings) must be disposed of according to local regulations. Never dispose of residues directly into drains.
